

RFID Bale Tag is the ideal solution for tagging and tracking any type of bale. Whether it's for agricultural, cardboard, printing, recycling materials, fabrics or non-wovens, the RFID Bale tag can easily be attached to any type of bale. The tag's polymer construction protects the text and RFID inlay from the elements providing superior tag stability, durability and performance compared to other paper based RFID tags.

The 5/16" nickel grommet gives additional strength to the tag to ensure tags cannot tear away because of wind or weakening around the attachment point from moisture or wear. Available in a wide variety of color's, each tag can be custom printed to meet any design specification and provide high contrast and visibility on any bale.

Features

Ideal for bale attachment and tracking
Removable and reusable – creates more ROI
Made of durable polymer materials

Product Print Options

Barcode . Data Matrix . QR Code . RFID .
Serial Number . Text

Product Functionality

Abrasion Resistance . Chemical Resistance .
Heat Resistance . UV/Outdoor Durability

Popular Applications

Agriculture . Warehouse / Distribution
Centers . Manufacturing

Category

RFID Tags

Specifications Data

Material	.002" polypropylene, .001 polyester over laminate
Serialization	Bar code and human-readable equivalent is produced using the latest high-resolution digital technology available, which provides excellent clarity and easy scanning. Code 39 is the standard symbology with a range of 2.7 to 9.4 CPI (characters per inch). Optional symbologies are available.
Label Copy	The label copy may include block type, stylized type, logos or other designs
Colors	Standard colors include black, red, yellow, green, dark blue, orange, purple or blue. Custom spot colors are also available at no additional charge. Due to contrast needed for the bar code scanner, all bar codes are black.
Standard Adhesive	Hanging tag
Frequency Range	860-960 MHz
Sizes	6" x 3.5"
Packaging	Shipped in "work-out-of" cartons for convenient application.
Shipment	14 business days

Chemical Testing

Chemical Soak Test Results (24 hours): Test of label structure and printed image as well as readability of inlay.

Chemical Test Data

Test conditions	Result
Water	no effect
Glass cleaner	no effect
Bathroom cleaner	no effect
Alcohol	no effect
Acetone	Delaminated, inlay unreadable
NaOH	no effect
Nitric acid	no effect

Read Range Testing

In many cases the tags read intermittently for longer distances than those indicated, however, the results reported below were for continuously responding reads.

Read Range Test Data

Anechoic chamber results

Sample	Metal	Plastic	Cardboard	Wood	Free Air
Average	15 feet	8 feet	8 feet	12 feet	27 feet
